

Connector screw

Connector screw

Description

- Connector screws are recommended for the installation of angle brackets, frame shoes and strips.
- White electro-galvanised steel.

Product benefits

- The conical shape under the head allows full contact of the screw with the hole, which favours the transmission of forces.
- Very good pull-out resistance.
- Anti-splitting point allows easy and quick penetration into the wood.
- Can be dismantled.

Uses

SUPPORTS :

- Supporting element: solid wood, composite, glued laminate.
- Supporting element: solid wood, composite, glued laminate.

USES :

- Joist hangers, straps, brackets, stirrups....
