

Resin-anchor pintle with clip for façades with external insulation

For offsetting shutters on façades with external insulation

Gond isolation à la résine avec clip

Description

- Resin-anchor pintle for offsetting shutters in external thermal insulation.
- Made to meet your requirements in line with the thickness of the insulation and weight of the shutters
- Use a metal resin injection anchor sleeve in hollow materials.
- All materials.

Product benefits

- Ideal for lightweight/PVC shutters.
- The safety clip stops the shutter from flying out.
- The plastic protective ring prevents the 'battery effect (no rusting)
- Made in France.
- Can be cut to the correct length if necessary.
